

Monitoring and Surveillance

- Encourage practitioners to optimize their use of the CSMD
- Encourage practitioner education and awareness
- Improve proactive use of clinical monitoring tools
- Refine the high risk patient model and create prescriber and dispenser high risk models

Efforts to Assist Clinicians

- Tennessee Chronic Pain Guidelines promulgated September 2014
- Pain Clinic Guidelines to be promulgated January 2017
- Symposia around the state
- Continuing Education—providers with a DEA to receive 2 hours of CE during 2 year renewal cycle

Chronic Pain Guidelines Appendices

- ▣ Pain Medicine Specialist
- ▣ Risk Assessment Tools
- ▣ Pregnant women
- ▣ Use of Opioids in Worker's Compensation Medical Claims
- ▣ Tapering protocol
- ▣ Sample Informed consent
- ▣ Sample Patient Agreement
- ▣ Controlled Substance Monitoring Database
- ▣ Medication Assisted Treatment Program
- ▣ Morphine equivalents dose
- ▣ Psychological Assessment Tools
- ▣ Prescription Drug Disposal
- ▣ Safety Net
- ▣ Definitions
- ▣ Table of Frequently Prescribed Pain Medications
- ▣ Urine Drug Testing
- ▣ Special Consideration: Women of Child Bearing Age

Regulatory and Controlled Substance Update

T.C.A. § 68-1-128

High Volume Prescribers of Controlled Substances

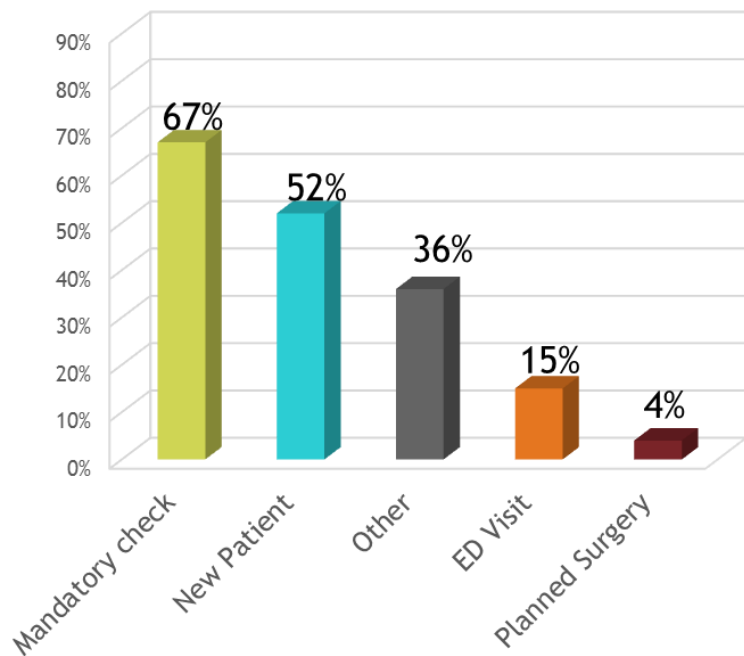

- Currently, the top 50 prescribers of controlled substances measured by morphine milligram equivalents in the state are annually identified and sent a letter notifying them of their inclusion on this list and asked to respond with a justification for their prescribing patterns.
- Additionally the top 10 prescribers from all of the combined counties having populations of fewer than 50,000 are also identified and sent a letter.

Regulation and Enforcement

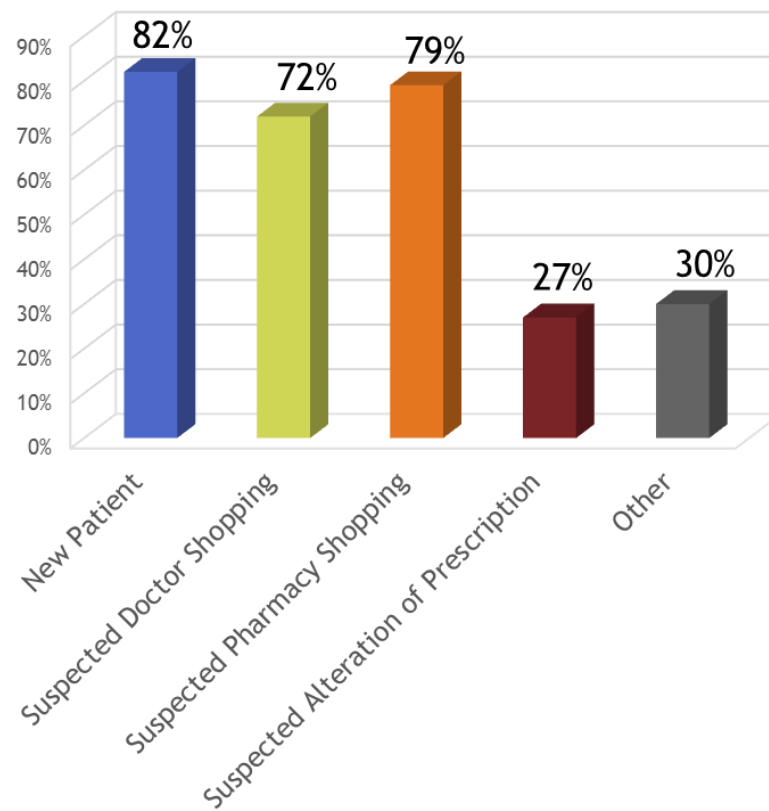

- Provide prescriber & dispenser education on regulation and enforcement
- Collaboration with law enforcement
- Eliminating “Pill Mills”
- Smarter Investigation
- Proactive regulation through surveillance

Why do you check the CSMD before prescribing?

Prescribers

Dispensers

Source: 2015 CSMD Prescriber and Dispenser Survey

Pain Management Specialist

- American Board of Medical Specialties (ABMS) or American Osteopathic Association (AOA) subspecialty in pain medicine, or eligibility to sit for the board examination
- American Board of Pain Medicine (ABPM) diplomate status
- American Board of Interventional Pain Physicians (ABIPP) board certification by passing exam 1 and 2
- An active pain management practice in a clinic accredited in outpatient interdisciplinary pain rehabilitation by the commission on accreditation of rehabilitation facilities
